

## Load Bearing Harness

SKU# LBH-SR-1200

Built specifically for Urban Search and Rescue, the Wolfpack Gear Load Bearing Harness is the first of its kind (Belt not included). The backbone of our modular system is the ability to rapidly reconfigure the system to meet a specific mission. The chest panel and hydration pack is designed to carry personal items and water and can be worn without the belt as a tactical vest. The belt utilizes our modified MOLLE system and will accept MOLLE and Alice Clip attachment systems. The belts can be preconfigured with the appropriate utility bags for specific missions. Quickly attach the belt to the tactical vest and you are configured for your mission.
