

## Transformer Spreader

Model 362R312

Model 362R312

Unlike any other spreader, the Hurst Transformer accepts three interchangeable arm lengths for maximum performance in a wide variety of applications. This highly flexible tool will pry, bend, and lift with power to spare. Check the specs and compare...we're up for the challenge. You'll discover that no other spreader can match this tool's capability.

### FEATURES & BENEFITS

- Three spreaders in one – the industry's first spreader offering a system of three interchangeable arm lengths (24", spreader 32" and 40") which can be removed easily and replaced in a matter of seconds.
- Interchangeable spreader tip system accepts a variety of spreader tip configurations.
- High-strength, replaceable tips permit chain & shackle attachment without tip removal (for use with diamond & auto tips only). Can not use chains with 40" arms.
- Kit includes transformer spreader tool, two 24" aluminum alloy arms, two 32" aluminum alloy arms, two 40" aluminum alloy arms, heavy-duty plastic carrying case and operator's manual.
