

Biel Tool

The personal forcible entry and rescue tool you can carry in your pocket

The Biel tool does it all... pry, cut, chop. Think of the times you have been exposed to situations when the need for a small, strong, forcible entry tool was immediate and you were unable to act because you carried no tool for the job.

Now you can act quickly! The Biel Tool, (pronounced BEE ' L) is a personal size multi-purpose forcible entry and rescue tool, designed for forcing doors and windows, prying and twisting hasps and locks, light overhauling, metal cutting and chopping. The Biel Tool incorporates many features found in the famous Paratech "Pry Axe", but is small, 15 inches (38 cm) long in its closed position and 19 inches (48cm) extended and light enough, 3.3 lbs. (1.5 kg) to wear on a belt, or to carry in the pocket of a coat. The Biel is constructed of alloy steel forgings, heat treated for maximum strength and durability, and chrome plated for easy maintenance.
