

# GAAM Fire Defender

Your home's defence against fires

GAAM Fire Defender - portable, reliable and easy to use

### Do you have reliable equipment in place to protect your home from ember attack and spot fires?

It is becoming clearer that the effects of global warming are producing extreme weather patterns and increasingly intense and longer lasting bushfire seasons. As a result, it is becoming more important for householders in bushfire prone areas to make sure they are equipped to tackle spot fires and ember attack during extreme periods when fire fighters are stretched to capacity.

### GAAM – a name trusted by Australia's Fire Brigades

For many years, Australia's Fire Brigades have relied on GAAM pumps to fight fires and now GAAM is pleased to introduce a domestic fire fighting package. The **GAAM Fire Defender** is designed for use around your home, perfect for tackling small fires and protecting your property during bushfires.

The GAAM Fire Defender is a portable, easy to use, fire fighting package for your home.

- > Honda 4 stroke petrol engine
- > Pump, providing 240 litres/minute and pressures to 390 Kpa
- > 25 mm x 30 metre delivery hose
- > Nozzle
- > Wajax quick connect storz couplings
- > 6 m length hard suction hose with brass foot valve
- > Trolley

### Easy to Use

Simply wheel the GAAM Fire Defender near your water source, connect the hard suction hose to the pump and submerge it in water (swimming pool, creek or dam). Connect the hose to the pump outlet, pull the cord to start the engine and aim the nozzle at the fire.

Don't take chances with fire. Invest in a GAAM Fire Defender so you won't have to stand by and watch helplessly if bushfire embers threaten your home.

Don't take chances with fire.

The GAAM Fire Defender is designed for use around your home, perfect for tackling small fires and protecting your property during bushfires.

## Frequently Asked Questions:

### ***What if my water source is in a tank?***

Connections are available to attach the suction hose to a tank outlet. Speak to GAAM for further consultation on the correct couplings for your particular tank.

### ***What if my property is more than 25 metres from my water source?***

Longer lengths of hose are available, or you can connect 2 lengths of hose together.

### ***How long will the pump run for?***

On a full tank of petrol, the pump will run for approximately 1¼ hours.

## About GAAM Emergency Products

GAAM began trading in 1933 as a small family engineering company, today GAAM is the only Australian manufacturer of Fire Fighting Pumps and their products are found on the majority of fire engines across Australia. Known for reliability and durability, GAAM manufactured products are rigorously tested before release to the field.

In addition to the manufacture of fire pumps, GAAM is also the sole Australian distributor for many fire and rescue brand names that are trusted worldwide by emergency services.
