

## FIRE TOOLS

### Root Soaker

#### GAAM Root Soaker

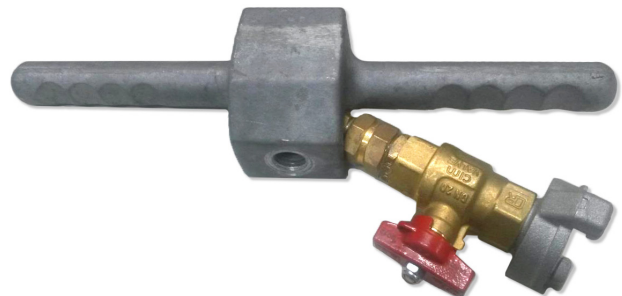

The new GAAM ROOT SOAKER has been designed and manufactured by GAAM Emergency Products to assist Fire Services in dealing with ground and deep seated fires.

The ROOT SOAKER is made from steel shaft nickel plated and alloy head and handle the nozzle is stainless steel and ball valve is bronze, with over 50 piercing holes located in shaft and tip to enable all directional impact making this equipment a very strong and effective piece of firefighting equipment.

The ROOT SOAKER is ideal for combating peat, tree roots, haystack and rubbish tip fires.

Root Soaker breaks into 3 parts for easy storage or if only short length required, shafts are 700mm long.

Alloy Head with 3/4 Bronze valve with BSP thread and able to suit all types of adaptors and with dual handle enables Soaker to be pushed into the ground with ease.

Product Shot

ROOT SOAKER stands at 1470mm when fully assembled  
by easy screw together thread.
