

Hydro-flo Australia Product Range

A Leading Manufacturer of Valves and Fittings

GAAM Emergency Products is a diversified business that provides specialised equipment, designed to meet the nature of emergency services and other industries operating in demanding environments.

Modern fire fighting, law enforcement and rescue response teams need access to an array of equipment so they can act quickly and decisively to fire and other emergency related events. Our equipment is comprehensive, with a product suitable for just about every situation. We offer a wide range of products, including; fire fighting pumps, fire accessories, lighting and protective clothing and equipment.

Providing the Best

GAAM is proud to introduce a new range of accessories to its portfolio. We are now a leading supplier of Hydro-flo Australia products, which allows us to offer our customers an extensive choice of foot valves and fittings.

The right solution for the right customer

GAAM offers; fire fighting fittings, adaptors, foot valves, nipples, sockets, reducers, flanges and hose tails from the Hydro-flo Australia range. These products are suitable for a broad range of applications and are ideal for; fire brigades, emergency services, mines, oil and gas facilities, forestry sites and plantation complexes.

Quality Assurance

GAAM and Hydro-flo Australia are committed to meeting customer's expectations by providing high quality products and exceptional service.

Hydro-flo Australia products are Australian made and are designed to deliver a; robust, light weight, compact and economical solution for customers. Many of these products are quite innovative in design that no other product can meet their specifications, including the patented foot valve.

Fire Fighting Fittings

The acetal fittings are the most popular fire fighting fitting. The acetal fittings are manufactured from "acetal" - which offers a high mechanical strength that is approximately 6 times stronger than pure aluminium. As a result, these acetal fittings offer superior dimensional stability and high resilience to deformation. The design and material structure of these fittings makes them tough, robust and durable. Ideal for the most challenging fire fighting applications.

Our people; there to make your people more effective

There are many emergency products to choose from and matching a product to a requirement is not always easy. That is why GAAM's skilled and experienced professionals have such an important role. We take the time to understand in detail the nature of your work and the requirements of equipment in the field. We know there are often no second chances in your line of work, so we like to make sure the equipment we provide will do the job correctly the first time.

GAAM is one of the most experienced businesses in the industry. Our people know what works and what does not. They are passionate about the equipment they work with and are happy to pass on their deep understanding of fire fighting and other equipment to you. The better informed you are, the better your equipment selections will be.
