Emergency Products and Solutions

# What's on offer

## Emergency products you can rely on

GAAM Emergency Products is a diversified company providing specialised equipment to emergency services and other industries operating in demanding environments.

We specialise in the design and manufacture of pumps for urban and rural fire fighting, as well as ancillary items such as nozzles, hoses and couplings.

GAAM also supplies a range of emergency services rescue and protective equipment, including; fire helmets, forced entry tools, hydraulic cutting gear, thermal imaging cameras, lights and sirens.

## Petrol Pumps

### Firestream (Petrol or Diesel)

The Firestream portable self priming pumpset has been developed to provide fire protection for rural fire services, households, farmers and councils. An excellent fire fighting asset for use where water is accessed via a pool, dam, tank or stream, as well as being a useful tool for draining, cleaning or general watering. The Firestream is available in petrol or diesel.

### MK4QF (Petrol or Diesel)

The MK4QF pumpset has been engineered and developed for high volume applications. This pumpset is easily handled by two fire fighters for onsite positioning.

The MK4QF is ideal as a portable pump for dewatering or supply applications. For dependable performance, reliability and durability the MK4QF is the real workhorse.

### MK250 (Petrol or Diesel)

The MK250 pumpset has been engineered and developed for tactical fire fighting. This pumpset is suitable for mounting on a tanker truck or can be easily handled by two fire fighters for onsite positioning.

For performance, reliability and durability the MK250 is the ideal solution.

Features include;

- > Flow rates to 1000 L/min
- > Pressures to 1200 kPa
- > Aluminium alloy pump casing
- > Stainless steel shaft
- > Bronze impellers, hydraulically balanced
- > Mechanical seal
- > Multi position discharge outlet

### MK125 (Petrol or Diesel)

This high performance fire fighting pump has been designed and built by GAAM as a truly portable unit. Providing flow rates to 500 litres per minute and pressures to 1145 kPa, this pumpset has been developed for both cost effectiveness and durability.

## Diesel Pumps

### Floating Pump

An exclusive auto prime system quickly removes entrapped air to assure a fast, positive, complete prime without the use of a suction hose.

The unsinkable float is foam-filled with high strength polyethylene that is very robust. The float has dual carrying handles and a splash suppression collar for engine protection in rough water.

### MK253

The MK253 is a high pressure fire fighting pumpset that can be supplied as either a basic or a fully equipped self contained fire fighting pumpset package.

The MK253 provides pressures up to 500 kPa and flow rate to 1000 l/min. Ideally suited to supply booster hose reels or where high pressure is required for long hose lays or monitor operations.

### MK300

The MK300 diesel powered pump, which is a high performance pump, provides high flow rates and pressures in order to meet fire ground requirements. The MK300 pump is one of the most reliable fire fighting pumpsets currently used in Australia and is a powerful, low maintenance pump offering pressures up to 1580 kPa and flow rates to 1400 l/min.

1040mm x 600mm x 800mm and weighing just 318 kg, the GAAM MK300 pump features hydraulically balanced bronze impellers; a mechanical seal; replaceable bronze wear rings; a four-position discharge outlet; a lightweight aluminium alloy body and direct close coupled to engine.

# Fire Pumps

## MK450

The MK450 pump enables fire fighters to select pressure or volume mode or enables both modes to be operated simultaneously.

The pressure mode will operate two booster hose reels up to 600 l/min total flow @1800 kPa. or 125 l/min @ 2000 kPa. The volume mode will allow a flow rate up to 3000 l/min @ 700 kPa.

## MK500

The MK500 pumpset has been engineered to meet the fire fighters' need for pumping volumes of water.

Whatever your volume needs, this pumpset gives the performance required of a self-contained pumpset for urban, industrial or rural applications. Custom designed options include; combination of soft suction and discharge manifolds, foam systems, tank by-pass or relief valve mounting.

# Fire Pumps

## Domestic Pumps

### Fire Defender

Do not take chances with fire. The GAAM Fire Defender is designed for use around your home - perfect for tackling small fires and helping to protect your property during bushfires.

The GAAM Fire Defender is a portable, easy to use, fire fighting device which can draw water from a swimming pool, dam or creek.

## PTO Driven Pumps

*Pictured: Single Stage Pump*

### Hale Midship

Hale's Midship pump is lighter than current midship pump designs, resulting in lower loads on the chassis. The innovative one piece body allows easier access to the impeller and mechanical seal, minimises piping requirements and makes routine maintenance easier. The Midship compact design produces a shorter pump box and increased compartment room for water tanks or personnel.

### Hale CBP Pump

Hale's CBP single-stage centrifugal high-volume initial attack/booster pump series puts heavy duty performance into a lightweight package. The CBP pump models are driven by your truck transmission power take-off, and can save wear and tear on your midship pump. The model CBP initial attack/booster pump is designed and engineered for maximum reliability. It features a fine-grain cast iron pump body, and a top-quality, heavy-duty gearbox designed and manufactured at Hale.

### Customised Requirements

GAAM can endeavour to design and manufacture pumps to match your specific requirements or criteria.

GAAM can tailor your needs for the following options:

- Pumpend Bronze or Alloy Option
- Priming Options
- Foam System Option
- Skid Mounted Option
- Control Panel Option

## Thermal Imaging

### T4 Max Thermal Imager

The new T4 Max Thermal Imager from Bullard offers the latest technology for the fire service in a small, lightweight and compact package. T4 Max integrates an ultra-high resolution infrared engine, widescreen display, digital zoom, Super Red Hot™ colorization and Electronic Thermal Throttle™ for maximum performance and clarity.

## Foam Proportioners

### Quenchmaster Foam Proportioners

Quenchmaster is an around the pump fire fighting foam proportioning system, developed to provide simplicity of installation and operation. This reliable foam system offers:

- > A range of 15 models to suit various flow rates and pressure
- > Flow rates of 200 - 1500 l per/min and operating pressures of 400 - 1000 kPa
- > Remote mounting or control panel mounting options
- > Easy installation for retro fitting
- > Flexibility for installation on new and existing fire fighting vehicles.

### Primers

**Hand Primer** - GAAM 500 Series diaphragm Hand Primers provide rapid, reliable pump priming and are strong, simple and positive in action. Easy to install with standard fittings, the GAAM 500 Series Hand Primers are versatile in application and are suitable for fitting to practically any pumping unit.

**ESP Primer** - Hale's ESP Priming System provides fast priming, high vacuum performance and reliability. Technologically advanced, the ESP is self-lubricating and semi-automatic with a single action control valve, which simultaneously activates the entire system, ensuring fast, consistent air evacuation.

# Fire Accessories

## Root Soaker

The Root Soaker is made from steel shaft nickel plate, with an alloy head and handle. The nozzle is stainless steel and valve bronze. Over 50 piercing holes located into enable all directional impact, making this equipment a very strong and effective piece of fire fighting equipment. It is ideal for combating peat, tree roots, haystack and rubbish tip fires. It can break into three parts for easy storage or if only short length is required. Shafts are 700mm long. Optional Carry Bag available

## Nozzles

## Hand Nozzle Range

Nozzles are critical components in fighting fires – these devices direct the water or foam onto the flame. They need to be well suited to the type of fire likely to be encountered, well matched to the flow and pressure characteristics of the pump, and easy for operators to handle in a variety of situations and positions.

We offer two types of hand held fire fighting nozzle ranges:

- > **Automatic Hand Nozzle Range:** Standard, Mid-Range Automatic and Dual Pressure Automatic models.
- > **Selectable Hand Nozzle Range-** Quadrafog and Thunderfod Selectable Gallonage and Twister Dual Gallonage models.

## Monitors

## Blitzfire Ground Monitor

The Blitzfire Ground Monitor is a simple, light, and highly manoeuvrable attack monitor. The Blitzfire's low elevation angle makes it suitable for use indoors. It can go anywhere a handline goes while delivering far more water. If the Blitzfire starts to slide or lift the "Safety Shut-Off Valve" automatically shuts off the flow of water. This safety feature reduces the risk of injury from an out-of-control appliance. The Blitzfire's discharge pivots make directing the stream extremely quick and effortless. A unique up/down pivot on the hose inlet allows the monitor to have stability even on porches, stair landings or the like. The main body is hardcoat anodized aluminium with a TFT powder coat finish inside and out.

## Crossfire Monitor

The Crossfire Monitor is the most versatile and innovative master stream appliance ever offered to the fire service. Its lightweight, compact design and unique quick-release swivel joint allow for a faster and safer stream deployment in the portable attack mode. Should the monitor lose contact with the ground surface, the monitors "Safe-Tak" will automatically reduce flow to the monitor. This safety feature reduces the risk of injury from an out-of-control appliance.

## Rescue Mats

### Paratech Lifting Air Bags

Paratech manufactures pneumatic high-pressure heavy lifting air bags for heavy-duty, low profile heavy lifting, emergency rescue, HAZMAT management or industrial use. These lifting air bags are ideal when maximum lifting force is needed in low clearance situations.

Heavy lifting air bags are thin in profile and simple to use. The convex dimpled, interlocking surface provides superior gripping power when two lifting bags are stacked on top of each other.

The application range of our standard pneumatic lift air bags is further expanded by heavier industrial lift bags. Custom engineered heavy lifting bags for special purpose applications are also available. Use for heavy load shifting, dunnage, levelling, or padded support.

### SCBA Mats

The scene of an emergency is no place for disorganisation. Fire Brigade and rescue crews need to quickly establish a structured staging scene, with easy access to tools and full breathing apparatus cylinders.

The SCBA Mats get BA cylinders and BA equipment off the ground and tarpaulins or makeshift rigs into order; saving valuable time in emergency situations. These mats are designed to be quickly and easily set up at any emergency scene and the rip-stop vinyl material ensures they are water and weather proof as well as easy to clean using just soap and water. These staging mats are also the first of their kind in Australia and can be customised on request.

## General

### Fire Fighting Helmet

Fire fighters who need a tougher, more durable helmet choose the Bullard Firedome helmet with the injection moulded thermoplastic outer shell. Made of ULTEM®, a high heat thermoplastic, the outer shell provides greater impact and penetration resistance than fibreglass and is more reliable with repeated heat exposures. The Firedome helmet incorporates valuable recommendations made by fire fighting professionals, so we can deliver more comfortable and durable protection.

### Hazmat Smart Strip

A user friendly wearable chemical indicator that can be worn by first responders, such as; citizens, police, fire fighters, EMS, hospital workers, USAR teams and the military. Current industry requirements requires responders to tape a number of indicator strips to their clothing in an effort to detect a contaminated atmosphere (aerosolized) or surface (liquid). However, current technology is not user friendly while responders are in the field and dressed in chemical protective clothing. Which is why an easy to use, cost effective, reliable, detection medium is required.

### Remote Area Lighting

Fire and emergency services now have portable remote area lighting to illuminate any low light solution or site. Pelican Remote Area Lighting systems provide a powerful and versatile alternative to wasteful gas powered generators. GAAM offer two key solutions, the 9450B Remote Area Lighting System (RALS) and the 9430 Remote Area Lighting System (RALS).

# More than just pumps

## Unrivalled expertise in emergency and extreme environments

Since 1933, Australian fire fighters have relied on our equipment to bring fires under control. GAAM is a specialist in the design and manufacture of pumps for urban and rural fire suppression, manufacturing a wide range of petrol and diesel powered fire fighting pumpsets and ancillary systems.

## The best products from around the world

GAAM sources products and components specifically for fire, rescue, police, security, ambulance, SES and other emergency services and industrial organisations from suppliers around the world. Along with an extensive range of fire pumps, hoses, valves and nozzles our product range includes; riot equipment, rescue equipment, forced entry equipment and vehicle lights and sirens.

GAAM has supplemented its product range by becoming the exclusive Australian distributor for a variety of products made by icon companies such as: Bullard, Godiva, Hale, Hurst, Niedner, Nupla, Paratech, Sava, TFT, Federal Signal, Wildfire and Visibility System Company.

## Our people; there to make your people more effective

There are many emergency products to choose from and matching a product to a requirement is not always easy. That is why GAAM's skilled and experienced professionals have such an important role. We take the time to understand in detail the nature of your work and the requirements of equipment in the field. We know there are often no second chances in your line of work, so we like to make sure the equipment we provide will do the job correctly the first time.

GAAM is one of the most experienced businesses in the industry. Our people know what works and what does not. They are passionate about the equipment they work with and are happy to pass on their deep understanding of fire fighting and other equipment to you. The better informed you are, the better your equipment selections will be.
