Masterstream 1250

Masterstream 2000

Masterstream 1250

Web Key: M

The Masterstream 1250 series gives a clean far-reaching straight stream.

- **Automatic pressure control**
- **Five selectable gallonage settings or a factory-ordered fixed orifice**
- **Suitable for use with foam and accepts the FJ-LX-M Foamjet low-expansion air aspirating attachment**
- **Automatic models: 150-1250 gpm/100 psi – manual, electric, or hydraulic remote control**
- **Selectable gallonage model: 250, 350, 500, 750, and 1000 gpm/100 psi**
- **Fixed gallonage models are pre-set at the factory to your choice of flows and pressures up to 1000 gpm/100 psi**

Masterstream 2000

Web Key: MS

The Masterstream 2000 is the only automatic fog nozzle that offers an excellent, hard-hitting stream at any volume from 300 to 2000 gpm at 100 psi.

- **Maintains an accurate 100 psi at the nozzle throughout its range**
- **Adjustable from straight stream to dense fog pattern**
- **Manual, electric, or hydraulic remote control**

Masterstream 4000

Web Key: MT

The Masterstream 4000 is the only variable pressure nozzle with a flow range of 600 to 4000 gpm and features a unique user-selectable operating pressure control.

- **Operating nozzle pressure is field-adjustable by simply turning a knob on the front of the nozzle**

- **Adjustment is anywhere between 80 and 120 psi**

- **Manual or hydraulic remote control**

Blitzfire and Blitzfire OSC

Web Key: PPM

The Task Force Tips Blitzfire is a simple, light, and highly maneuverable portable attack monitor with a low elevation angle that makes it suitable for initial attack indoors. It can go anywhere a handline goes while delivering much more water and is ideal for 2-1/2" and 3" attack lines.

- **Exclusive safety shutoff valve automatically shuts off the water if the unit starts to slide or lift**
- **To reset the flow, simply open the valve to any of six detent flow positions with the turbulence-free slide valve**
- **A unique up/down pivot on the hose inlet allows the monitor to have stability even on porches, stair landings, and other such surfaces**
- **Flow range to 500 gpm with minimal friction loss**
- **Integrated slide valve for firefighter flow control**
- **Carbide tips and wide stance for improved stability**
- **Optional automatic oscillation package**

- **Automatic, dual-pressure automatic and stacked tips nozzles available**

Max Series Masterstreams

Web Key: MF

TFT's Max-Force automatic, Max-Matic automatic, and the new fixed-gallonage Max-Flow, take fire streams to the MAX with flow ranges from 100 gpm up to an incredible 500 gpm.

- **Max-Force Dual Pressure Automatic available with 100/55 psi or 80/45 psi pressure choice**
- **Max-Matic Single Pressure Automatic available with 100 psi or 80 psi pressure choice**
- **Max-Flow fixed gallonage operates at 500 gpm /100 psi**

For additional information call 1-800-348-2686, visit www.tft.com or contact your local authorized TFT distributor.

Max-Force Nozzles

Monitor Systems

Crossfire Portable Monitor Web Key: XC

The Crossfire monitor, the most versatile and innovative Masterstream appliance on today's market, offers a lightweight, compact design and unique quick-release swivel joint for a faster and safer stream deployment in the portable attack mode.

- *The revolutionary, patented Safe-Tak "flow safety valve" automatically reduces flow to the monitor if ground contact is lost, reducing the risk of injury from an out-of-control appliance*
- *Flow range to 1250 gpm with minimal friction loss*
- *Designed for use either on the apparatus, attached to a fixed monitor, or on a portable base*
- *Stainless steel spring legs with carbide tips for improved stability*
- *Automatic combination nozzle or stacked tips nozzles available*
- *Designed for 2-1/2" and 3" attack lines or 4" or 5" Storz attack lines*

Crossfire Portable Monitor

Hurricane RC Remote Control Monitor Package

Web Key: XFRC

The Hurricane RC Remote Control Monitor Package incorporates the stream quality of the Masterstream 1250ER, the functionality of the electric Extend-A-Gun RC3, and the high-flowing Hurricane RC remote-controlled monitor.

Hurricane RC

- Full, 3" waterway provides 1250 gpm flows while maintaining a full 450° rotational travel
- Available for either 12- or 24-volt installations with factory-installed motor control circuits to minimize installation procedures
- Delivered with a factory-installed control panel mounted on the monitor
- Motors and control boxes are factory tested for water tightness
- Choice of panel mount, tethered, or radio frequency remote controls

Remote Control Extend-A-Gun RC3

- Full, 3" waterway provides 1250 gpm flows with only minimal psi loss and virtually no turbulence
- 18" extension heights

Masterstream 1250ER

- Masterstream 1250 fixed, selectable, automatic nozzles or stacked tips provide outstanding stream performance under changing fireground conditions

For additional information call 1-800-348-2686, visit www.tft.com or contact your local authorized TFT distributor.

Monsoon RC Remote Control Monitor Package

Web Key: YRC

For the sheer power and performance you need to tackle the toughest challenges, rely on Task Force Tips Monsoon RC Remote Control Package, which incorporates the new Monsoon RC, Extend-A-Gun RC4, and TFT's exclusive Masterstream 2000 automatic nozzle.

Monsoon RC

The Monsoon RC is an electric remote-controlled monitor with an exclusive segmented, low-profile waterway discharge.

- **High flow/low friction loss characteristics and is capable of flowing 2000 gpm while maintaining a full 450° rotational travel**
- **Available for either 12- or 24-volt installations with factory-installed motor control circuits to minimize installation procedures**
- **Delivered with a factory-installed control panel mounted on the monitor**
- **Motors and control boxes are factory tested for water tightness**
- **Designed for pumper and aerial apparatus**
- **Choice of panel mount, tethered, or radio frequency remote controls**

Remote Control Extend-A-Gun Series

- **Full, 4" waterway provides 2000 gpm flows with minimal psi loss and virtually no turbulence**
- **Outstanding reach and penetration**

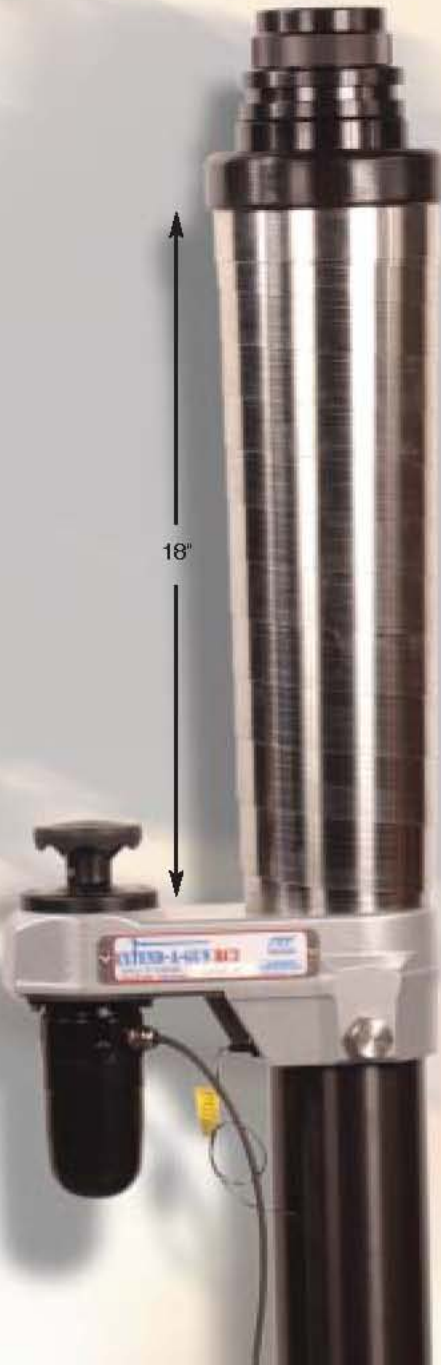

Masterstream 2000ER

- **Masterstream 2000ER automatic nozzles or stacked tips provide outstanding stream performance under changing fireground conditions**

TFT distributor.

Extend-A-Gun Series

The Extend-A-Guns provide new capabilities for your deck-mounted master stream device. The manual Extend-A-Guns offer these features:

Manual Extend-A-Gun

Web Key: XG

- Can be lowered to deck level or into a monitor well for storage
- On the fireground, the monitor may be raised manually to its extended position, 12 or 18 inches, by lifting the quick release and raising by hand until the non-rotating pipe locks into position
- Extend-A-Guns offer full 360° monitor rotation operation in either the raised or lowered position

Extend-A-Gun RC3

Web Key: XGRC

- 12- or 24-volt electric motor remotely raises or lowers the gun 18"
- Remote-controlled operational panel mounts on pump panel
- 3" waterway for flows up to 1250 gpm
- Accents either the manual Crossfire monitor, manual Hurricane monitor, or the remote-controlled Hurricane RC monitor

Extend-A-Gun RC4

Web Key: XGRC

- 12- or 24-volt electric motor remotely raises or lowers the gun
- Remote-controlled operational panel mounts on pump panel
- 4" waterway for flows up to 2000 gpm
- Accepts either the manual Monsoon monitor or the remote-controlled Monsoon RC monitor

Remote-control Monitor Packages

TFT offers two exclusive remote-control monitor packages created specifically to provide maximum stream performance while keeping firefighters safely on the ground during high-flow operations.

Designed for the harsh fireground environment, these remote-control monitor packages offer the best electronic moisture protection in the industry.

- *Remote controls are easily operated and have a variety of options and functions*
- *Remote-controlled automatic Masterstream nozzles available*
- *Remote-controlled Extend-A-Gun raises 18" for operational clearance*
- *Through unique waterway designs, the remote-controlled monitors provide maximum stream performance with low friction loss*
- *Interfaces with apparatus multi-plexed electrical systems*
