DEKONMATE®

DECONTAMINATION WIPE

Firefighting Decontamination Solutions

THE ISSUE

RECOMMENDED AREAS OF USE:

Firefighter Cancer is a Global Phenomenon

Research has shown this is likely due to dermal exposure to harmful contaminants such as polycyclic aromatic hydrocarbons, organophosphate flame retardants, polybrominated diphenyl ethers and metals.

Using our recommended 2 wipes per area has been scientifically proven to remove up to:

- PAHs 97%
- PBDEs 94%
- OPFRs 91%
- Metals 90%
